

eero | Fact sheet

COMPANY BACKGROUND

Years of personal WiFi frustration first inspired the idea for eero. Tired of being his parents' personal IT help line, Nick jury-rigged a WiFi setup for them that was easy for him to reset from across the country. While studying at Stanford, Nick met cofounders Nate and Amos, who shared his exasperation with the state of home WiFi.

After college, Nick joined Menlo Ventures, where he worked with startups like Uber, Dropcam, Roku, and Periscope. For Dropcam and Roku, WiFi connectivity was (and remains) a major customer support issue. Seeing a void in the market, Nick looked to invest in a better WiFi solution, but had no luck. Amos' deep cloud infrastructure and scaling expertise combined with Nate's academic networking experience made them the perfect team to build eero.

EERO IS THE WORLD'S FIRST HOME WIFI SYSTEM

WiFi is the new electricity, the foundation of the digital home. We rely on it to work, stream our favorite movies and TV shows, and connect with the people we love. But it's broken: confusing setup, painful passwords, ugly equipment, and customer service that rivals the DMV. And no matter how powerful, a single router is never going to cover your whole home — it's like asking a loud speaker in your living room to provide great sound throughout your home. You need WiFi access points distributed throughout so that you're always close to one.

With eero, plug one device into your modem. Additional eeros just need power from a standard outlet. They automatically connect to each other to create a wireless mesh network, the first available on the consumer market. If you have Ethernet wiring, you can hardwire some (or all) of your eeros. No more buffering. No more dead zones. Finally, WiFi that *actually* works.

WHERE TO BUY

eero.com
Amazon

PRICE

eero WiFi system (3-pack) — \$499
eero (individual) — \$199

Features

SIMPLE SETUP

Plug one eero into your modem and the app will help you place the others strategically throughout your home. You can name your network anything you want. Personality encouraged.

SMART SECURITY

eero automatically downloads the latest security updates. You don't need to lift a finger because eero ensures that your system is always up-to-date.

EASY SHARING

Seamlessly grant access to friends and family or share a separate guest network with them. No need to dig through the kitchen drawer for your WiFi password.

STAYS NEW, GETS BETTER

Regular, automatic software updates only take a minute and happen overnight when you're not using your network. That means your eero system will only get better with time.

MOBILE APP

Manage your entire WiFi network from a simple, intuitive app. See which devices are connected and the speeds you're clocking.

SELF-FIXING

Your system runs regular checkups. If there's ever a problem, eero fixes itself. Put away the paper clip, no manual reset needed.

IN THE BOX

- eero(s)
- Ethernet cable
- Power cord(s)

YOU'LL ALSO NEED

- iOS or Android device
- Internet service
- Cable or DSL modem

Tech specs

DIMENSIONS

Width: 4.75in (121mm)
Depth: 4.75in (121mm)
Height: 1.34in (34mm)

PROCESSORS, MEMORY AND STORAGE

1.0 GHz dual-core processor
512MB RAM
4GB flash storage

WIRELESS CONNECTIVITY

Dual-band WiFi radios, simultaneous 2.4 GHz and 5 GHz wireless, 2x2 MIMO, IEEE 802.11a/b/g/n/ac, Bluetooth® Smart Ready

WIRED CONNECTIVITY

Dual auto-sensing Gigabit ports for WAN (cable or DSL modem) and/or LAN (networked device) connectivity, USB 2.0 port

SECURITY AND NETWORKING SERVICES

WPA2 personal wireless encryption, DHCP, NAT, VPN passthrough, UPnP

ELECTRICAL AND ENVIRONMENTAL REQUIREMENTS

100-240V AC, 50-60Hz, operating temperature: 32° to 95° F (0° to 35° C), operating relative humidity: 20% to 80% (non-condensing)

REQUIRED FOR SETUP

Supported iOS or Android™ device, Internet service (with cable or DSL modem, if required). See eero.com/requirements

WARRANTY

1-year limited warranty. See eero.com/legal
